TRAINS®  
LINE**

*Experience & Quality  
You Can Depend On*

Dear Model Railroader:

Welcome to our 2019 Micro-Trains Product Guide. Located in Southern Oregon, Micro-Trains manufactures premier N and Z scale rolling stock, our popular Magne-Matic® Coupler System, and a variety of model railroad tools and accessories, in our 33,000 sq ft factory. And we've been at it for over 46 years!

During 2019, we have an array of all new model railroad products, that we'll be designing, tooling and producing for you, our valued customer. This year our new tooling will include our 11th Heavyweight Passenger car, in this series; the Single Window Coach Car.

And given the popularity of our N scale DODX 68' flat car with military loads; we'll be producing our own injection-molded multipurpose, light 4-wheel drive military utility vehicle known as the Humvee, as the next military load for our DODX flat cars.

Already underway, Micro-Trains has been enhancing our ever-popular 40' and 50' box cars by lowering the car's underframe to the rail, and offering "cored through", injection-molded roof walks, similar to what we've already done with our 50' box car roof walks. In addition, we're modifying the cars to body-mount couplers, and where appropriate adding etched metal brake platforms to the car ends. We're essentially making the best N scale rolling stock, even better!

In addition to tooling up all new rail cars and accessories, Micro-Trains continues the tradition of issuing prototypical railcar series during 2019; we'll be introducing our "Farm-to-Table" Reefer series in both N and Z scale. This series will feature 12 prototypical reefer cars. We also have a number of multi-car packs planned for 2019.

Speaking of the year 2019, Micro-Trains will recognize throughout the year, the 50th anniversary of the N scale patent issued for our Magne-Matic® Couplers that revolutionized N scale model railroading! Through the years we've seen a number of knock-off knuckle couplers, but none have offered the reliable, hands-free coupling and uncoupling like our Magne-Matic® couplers.

Micro-Trains strongly encourages you to support your favorite model train and hobby retailers. In addition, please know that we do offer our own online retail store. This provides but one more option to shop and purchase our entire line of N and Z railcars, sets, tools and accessories.

In closing, please know all of us at Micro-Trains appreciate the interest and support of N and Z scale modelers from around the world. We look forward to offering the best trains during 2019 and beyond!

# Your source for Z!

Are you new to Z scale? Well, here, 'less' is truly 'more'. Do you have only limited space? No problem, with Z scale you can get the most out of your space. Our line has over 35 freight and passenger car styles and have also produced 4 powered locomotives. In addition, we have sectional roadbed track and flex track. Visit our online store to view our full line of Z scale products.

# American Prototype Roadbed Track

Finally, quality track with accurate U.S. tie spacing! Our line of sectional track features code 55 nickel-silver rails, decorated roadbed and ties, and prototypical U.S. tie spacing. And thanks to our Dual Joining System (DJS) which uses plastic roadbed joiners and separate rail joiners, our track connects with ease.

# Farm-To-Table Reefer Series

Moving perishables by rail began in the mid 19th century in an effort to move dressed meats beyond local urban markets. As technology advanced, by the early 20th century, anything could be quickly transported from farms to kitchens across the country. These wood-sided ice reefers were dominant revenue earners for almost 100 years until mechanical refrigeration became practical, and they also served as rolling billboards for the companies. Our series will feature twelve unique and colorful 'produce' reefers in both N and Z scale.

Car #1

Car #2

*Series Begins February 2019*

# Thomas Kinkade Painter of Light™ Boxcar Series

Thomas Kinkade, the Painter of Light™, emphasized simple pleasures and inspirational messages through his art – and the branded products created from that art. From textiles, to collectibles, to music and books, Thom believed that both the ability and the inspiration to create his paintings had been given to him as a gift. His goal as an artist was to touch people of all faiths and to bring peace and joy into their lives through the images he had created. This N Scale series will feature twelve remarkable Thomas Kinkade paintings on black boxcars and will also include a locomotive and caboose. Each car will be equipped with interior lighting that can be turned on and off from the outside of the car using a wand, to illuminate the painting on the side of the car. Cars will also be available without their interior lighting component.

*Series Begins March 2019*

\*Renderings shown for representation only.

# Prototype Train Sets

If you like our locomotives, you'll be happy to know that many of them are available in our train sets which includes 4 freight cars and a caboose. Sets can come with or without an oval loop of track. While each set is identified by the scheme of the locomotive, the freight cars and caboose schemes may vary from set to set. These sets are a great way to get started in model railroading.

For a complete and current list of available product and pricing, contact your authorized Micro-Trains dealer, or go to [www.micro-trains.com](http://www.micro-trains.com)

## Specialty Sets

Just getting into model railroading? We offer a variety of themed sets in both N & Z scale each year. Some of these sets are quite prototypically accurate to the real life cars, while other sets are pure fantasy schemes like our Halloween Dr. Mort's Creepy Carnival Set. There's always an exciting specialty set in the works, so stay tuned!

# Need More Numbers?

## N & Z Scale 4-Car, 8-Car and 16-Car Runner Packs

You've asked for more road numbers and we've been listening. Now you can get your favorite roads with four, eight or sixteen different road numbers so you can build your consist. And if you place your order during our pre-order window we guarantee you'll get your Runner Pack.

# Special Offerings

Looking for unique model train equipment? You have come to the right place! With our in-house tooling department, 3D printers and other production methods, we are capable of producing a variety of specialized models and loads for your layout. Wind turbine blades and plastic-injection molded fuselage loads with 3D-printed ice-breakers and other supporting pieces are some examples of special railroad equipment products that we have offered. Watch the months ahead for more unique offerings!

# N & Z Weathering

Our line of custom weathered N & Z scale freight and locomotives features uniquely decorated rust, grime and fading detail on each side of the car. You'll also find paint-over markings, oil stains on tank cars and colorful graffiti markings as well. Sign up for our free E-line Newsletter to be notified of coming weathered cars or watch the Micro-Trains website in the middle of the each month to see our newest weathered releases.
